

# ***SPEEDY-CLEAN***

## **THE ACID-ALTERNATIVE CONCRETE DISSOLVER**

**NO SULFURIC ACID**

**NON-CORROSIVE**

**NO MURIATIC ACID**

**NON-FUMING**

**NO HYDROCHLORIC ACID**

**NON-FLAMMABLE**

**NO PHOSPHORIC ACID**

**100% BIODEGRADABLE**

*NON-HAZARDOUS TO EQUIPMENT*

**USE TO CLEAN: CONCRETE SPLASH ON SIDING, FOUNDATIONS PATIOS & WOODEN DECKS • READY-MIX TRUCKS, MIXERS, VEHICLES • FORMS, MOLDS. CEMENT BUGGIES, • PUMPS • TROWELS, SCREEDS • CONCRETE SAWS • SLIP-FORM PAVERS • AUGERS AND MORE!**

***SPEEDY-CLEAN*** is a liquid compound specifically formulated to dissolve built-up cement on tools and equipment associated with the concrete ready-mix industry. The highly-concentrated formulation is compounded to maintain sufficient acidity to dissolve hardened cement. The softened concrete substance is then cold-water rinseable with a high-pressure washer.

***SPEEDY-CLEAN*** can be used to remove cured cement, concrete, mortar, grout or stucco from any surface and also removes old rust and oxides.

***SPEEDY-CLEAN*** is also odorless and non-fuming, nonflammable, will not harm paint, is non-corrosive and 100% biodegradable.

**Sold By:**

***SPEEDY-CLEAN*** is a liquid compound alternative with no odors of fumes. It attacks the Portland in cement, completely dissolving the hardened cement to a mushy substance that is completely rinseable with high-pressure and cold water. ***SPEEDY-CLEAN*** can be used to remove cured cement, concrete, mortar, grout or stucco off any surface.

### **DIRECTIONS FOR USE**

**IMPORTANT: NEVER WET SURFACE BEFORE APPLYING *SPEEDY-CLEAN*.**

- ***SPEEDY-CLEAN*** is most effective when applied with a brush, thereby removing already neutralized cement while at the same time exposing un-neutralized cement to ***SPEEDY-CLEAN***.
- Completely saturate area of hardened concrete to be removed with undiluted ***SPEEDY-CLEAN*** through an air-foamer, sprayer or soft brush. Surface will turn white on contact, then darken. If ***SPEEDY-CLEAN*** evaporates, a white residue will appear. **DO NOT RINSE!** Re-apply ***SPEEDY-CLEAN*** to reactivate as needed until concrete has softened to a mush.
- Allow ***SPEEDY-CLEAN*** to penetrate for 10-15 minutes. Then re-apply to same area. Keep surface wet with ***SPEEDY-CLEAN***. Concrete will begin to soften and release from surface. (Total time approx. 20-30 min.) Treated concrete can be left overnight.
- Rinse with cold water through a high-pressure washer (1000-3000 psi). On extra-thick buildup, repeat cleaning directions until buildup has softened.

**CAUTION: ALWAYS WEAR EYE PROTECTION AND RUBBER GLOVES  
WHEN HANDLING ANY TYPE OF CHEMICAL.**

**KEEP OUT OF REACH OF CHILDREN**

#### **HMS RATING:**

**HEALTH: 2    FLAMMABILITY: 0    REACTIVITY: 0    PERSONAL PROTECTION: C**

#### **FIRST AID:**

**EYES:** All exposures are considered severe. Flush thoroughly in an eye wash for 15 minutes. Get medical attention immediately. **SKIN:** Wash for 5 minutes. **INHALATION:** If excessive inhalation has occurred, initiate oxygen administration at a 2 to 6 Liter per minute flow. Get medical attention immediately. **INGESTION:** Do not induce vomiting. Conscious patient: give orally high amounts of water or milk. Obtain medical attention immediately.

#### **DOT HAZARD CLASSIFICATION:**

Compound, Cleaning Liquid, (Not Regulated)
